CEO Letter

Second quarter is the start of the high season for Höganäs Borgestad Group. When comparing first quarter turnover for Höganäs Borgestad with second and third quarter the rise in activity and turnover is normally 50 percent or above for each quarter. Also this year the increase is reflected in the activity for Höganäs Borgestad, however the differens so far in 2024 is that the EBIT margins are improving as well.

Höganäs Borgestad has increased EBIT margin for each month and each quarter when comparing year on year. The increase in EBIT margin is due to increased focus on profitability and project execution that has proven positive for the EBIT margin. The margin improvement year to date and specifically in the second quarter, is not a coincidence, but hard work over time.

Höganäs Borgestad has year to date an EBIT margin of 6.0 percent compared to 0.4 percent in the same period 2023. Borgestad has guided

that in the medium term, Höganäs Borgestad should have an stabilized EBIT margin of 7 percent or above. Höganäs Borgestad has started the journey to increase EBIT, but it's still a lot of development and improvements to be implemented going forward.

Borgestad expect further increase in relation to EBIT margin in the coming periods and review the situation for Höganäs Borgestad as good for further development in 2024.

Borgestad will continue to implement the communicated strategy within both Höganäs Borgestad and Agora Bytom going forward. Both assets have a good position in their local markets, as local market leaders. The work that has started and always will be the goal, is increasing the trend related to profitability and results.

To summarize, Borgestad has a good underlying start of the year, and we expect to continue the positive development in 2024.

Note 5 Assets and Liabilities Classified as Held for Sale

Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through sale rather than continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less cost to sell and presented separately as assets held for sale and liabilities held for sale in the statement of financial position.

The criteria for held for sale classification is regarded as met only when the sale is highly probable, and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the plan will be made or that the plan to sell will be withdrawn. In addition, management must be committed to the plan, and it is expected that the sale will be completed within a year.

Property, plant and equipment and intangible assets are not depreciated or amortized once classified as held for sale.

Höganäs Bjuf Fastighets AB, an indirect subsidiary of Borgestad ASA, entered on

October 27, 2023, into a conditional agreement with Bjuv municipality in Sweden for a sale and leaseback transaction for two properties in Sweden where the Group's production plant and other production facilities for refractory products are located.

Borgestad Group will sell the two properties, including the production facilities, to Bjuv municipality and then lease the production facilities back to continue its production of refractory products in line with previous practice. Prior to completion of the transaction, the two properties will be transferred to a new wholly owned subsidiary of Höganäs Bjuf Fastighet AB, and the transaction will be structured as a sale by Höganäs Bjuf Fastighet AB of the shares in such subsidiary.

The transaction was approved by the Municipal Council of Bjuv on December 11, 2023, but the Group has been informed that a complaint regarding the approval from Bjuv municipality has been received prior to the expiration of the appeal period. The complaint relates to the purchase price in the transaction and that this, in the claimant's opinion, significantly exceeds the market value of the two properties. The complaint will be handled by the Administrative Court in Malmö (the Administrative Court"). The approval of the transaction by Bjuv municipality will only become binding once the complaint has been finally resolved in the claimant's disfavor, and the completion of the transaction is conditional upon such binding approval. The Group estimate that the transaction is completed during 2024. In connection with the sale the Group has outstanding interest-bearing debt to Nordea that will be repaid upon completion of the transaction. The total loan amount that needs to be repaid at completion is MNOK 47.4 per June 30, 2024. The loan amount is classified as interest bearing debt, current liabilities.

Alternative Performance Measures (APMs)

Alternative performance measures, i.e., financial targets that are not defined or stated in the relevant regulations for reporting historical financial information, are used by Borgestad in order to be able to provide supplementary information by excluding items which, in Borgestad's assessment, do not give a good indication of periodic operating profit or cash flow. Financial alternative performance measures are intended to provide better comparability of results and cash flows from period to period, and it is Borgestad's experience that these are often used by analysts, investors, and other actors. Borgestad uses the same performance targets internally in the work to further improve results and profitability in the business by setting long-term financial targets. Borgestad's alternative performance measures are defined based on adjusted IFRS concepts and are defined, calculated, and used in a consistent and transparent manner over time where it is relevant in all business areas and in the Group as a whole. Financial alternative performance measures must not be considered a substitute for reported results in accordance with IFRS.

Borgestad's financial alternative performance measures:

EBITDA: EBIT + depreciation, amortization and write-downs.

Interest-bearing debt (IBD): Long-term and short-term loans, including financial leasing obligations.

Net interest-bearing debt (NIBD): IBD minus Cash.

Working capital: Inventories, trade receivables minus trade payables.
